PROFILE

I am a Product Designer with a background in graphic design and growing expertise in UI/UX. I am skilled in creating user centered digital products through research, wireframing and thoughtful interface design. Proficient in Figma and front-end fundamentals, I possess a keen understanding of visual design and usability. My goal is to focus on designing intuitive and functional products that balance user needs with business goals. I have collaborated on UI/UX projects for web and mobile, applying end-to-end design thinking and visual design expertise.

SKILLS

(UX) User Research Design:

User Research (Interviews, Surveys, Insights Synthesis)
Information Architecture & User Flows
Interaction Design

User Personas & Journey Mapping
Usability Testing & Feedback Analysis
Wireframing

(UI) User Interface Design:

Design Systems & Component Libraries
Responsive Web Design (Mobile-First)
Interactive Prototyping (Low- & High-Fidelity)

Accessibility (WCAG Principles)
High-Fidelity Interface Design
Mobile App Design

End-to-End Product Design (Research → Wireframes → UI → Testing)

Tools & Software:

Figma
Basic HTML, CSS & FLUTTER

Visual Studio Code

Adobe Creative Suite

WORK EXPERIENCE

CompilerTech Company Limited - Collaborative UI Design Project

Problem & Objective:

The goal was to design a clear, visually appealing and user friendly website for **CompilerTech Company Limited**, ensuring visitors could navigate easily and access key information efficiently.

Process & Approach:

- Collaborated with a software engineer to translate functional requirements into a cohesive digital interface.
- Created low and high-fidelity UI designs in Figma, focusing on layout, navigation and visual hierarchy.
- Designed interface elements, typography, colour schemes and icons to create a consistent and professional visual identity.
- Prepared design assets and specifications for smooth handoff to development.

Outcome & Impact:

- Delivered an intuitive and visually cohesive UI aligned with the project's goals.
- Improved user navigation and readability, making key information easy to find.
- Strengthened the website's professional appearance, enhancing user confidence in the brand.

Tools Used:

- Figma, Adobe Photoshop, Adobe Illustrator

PROJECTS

Skillnova

Personalized Assessment App for Aspiring Tech Learners

Problem & Objective:

- Many aspiring tech learners struggle to transition into the field due to unclear readiness levels, scattered resources and lack of personalized guidance.
- Goal: Provide clarity, structure and confidence by recommending targeted resources and tracking learning progress.

Process & Approach:

- Conducted user research targeting students, young professionals and women & youth across Kenya to identify key pain points in tech upskilling.
- Developed user personas and mapped learner journeys to highlight knowledge gaps and friction points.
- Created low-fidelity wireframes to plan the app's flow and information architecture.
- Designed high-fidelity UI screens in Figma focusing on usability, accessibility and visual clarity.
- Built interactive prototypes to simulate progress tracking, course recommendations and personalized feedback.

Testing & Iteration:

- Conducted usability testing with representative users to evaluate navigation and feature clarity.
- Iterated design based on feedback, optimizing the onboarding experience and recommendation algorithm interface.

Outcome & Impact:

- Simplified learning pathway for aspiring tech learners, providing structured guidance and confidence.
- Streamlined onboarding process and course recommendation flow, reducing confusion and potential drop offs.
- Delivered a visually cohesive and accessible platform aligned with user needs and goals.

Tools Used:

- Figma, Adobe Photoshop & Adobe Illustrator.

Better School Choice

Mobile Platform for School Selection

Problem & Objective:

- Kenyan parents often struggle to find a school that fits their child's learning needs, values and budget due to a lack of centralized and trustworthy comparison tools.
- *Goal:* Provide clarity, transparency and confidence by enabling parents to search, filter and compare schools effectively.

Process & Approach:

- Conducted user research targeting first time parents, parents switching schools and tech comfortable parents to identify pain points in school selection.
- Developed user personas and mapped parent journeys to uncover challenges in comparing schools and accessing reliable reviews.

- Created low-fidelity wireframes to plan app structure, search functionality and comparison flows.
- Designed high-fidelity UI screens in Figma focusing on usability, accessibility and a visually intuitive comparison experience.
- Built interactive prototypes simulating search, filter, comparison and favourites features.

Testing & Iteration:

- Conducted usability testing with representative parents to validate navigation, filtering and comparison functions.
- Iterated designs based on feedback to simplify the search flow and improve review visibility.

Outcome & Impact:

- Streamlined the school selection process, reducing stress and time spent on research.
- Enabled parents to make informed decisions by centralizing school data and community insights.
- Delivered a visually cohesive, user-centered platform that supports transparency and confidence in decision making.

Tools Used:

- Figma, Adobe Photoshop & Adobe Illustrator

EDUCATION

YEAR

INSTITUTION

COURSE

FEBRUARY 2025 – AUGUST 2025	MORINGA SCHOOL	UI/UX DESIGN (PRODUCT DESIGN)
MAY 2024 – JULY 2024	ZETECH UNIVERSITY	COMPUTER AIDED DESIGN (AUTOCAD & ARCHICAD)
SEPTEMBER 2021 - SEPTEMBER 2024	KENYATTA UNIVERSITY	DIPLOMA FINE ART & DESIGN (GRAPHIC DESIGN)
AUGUST 2021 - OCTOBER 2021	ZETECH UNIVERSITY	EUP 1 & 2 (COMPUTER PACKAGES)
